

Combine Pack/Carton

Only use this option if you have consulted with a Software Specialist at Ecliptic first.

This will allow you to tie together 2 items that are related by the unit of measure. The most common items for this would be Packs/Cartons of Cigarettes but you may also need this relationship set up for Energy Drinks that are sold singly or by 4 Pack.

A screenshot of a software menu titled "Assign Category". The menu contains several options: "Assign Product Group", "Combine Pack/Carton", "Change SKU", "Set Receiving Pkg Qty", and "Cancel". The "Combine Pack/Carton" option is highlighted with a grey background. An arrow points from the text "Click **Combine Pack/Carton**" to this option.

Click **Combine Pack/Carton**

A screenshot of a software screen titled "Scan Pack". The title "Scan Pack" is circled in red. Below the title is a text input field, followed by "Enter" and "Cancel" buttons.

Scan the **Pack** item. Be sure to watch what is on the screen as it will tell you which item you should be scanning.

Click **Enter**.

A screenshot of a software screen titled "Scan Carton". The title "Scan Carton" is circled in red. Below the title is a text input field, followed by "Enter" and "Cancel" buttons. At the bottom of the screen, the following information is displayed:
Pack: 0012300200592
Barcode: 0012300200592
CAMEL 99 BOX

Scan the **Carton** item. Note that it shows the Pack barcode at the bottom as well as the Description. Verify that you are scanning the appropriate Carton to go with this Pack. If something is not correct click **Cancel**.

After scanning the Carton it will automatically go back to the Scan Pack screen and is ready to do another relationship. Click **Cancel** to return to the Utilities menu.

If the relationship between your Pack and Carton is something other than 10 you will need to edit this through the Enable software.

Find the item in List Items and Open it
